① Test Run

<u>A/cm²</u>	<u>Duration</u>	<u>Depletion</u>	<u>Calculated Depletion/Unit Time</u>
10	20	40	2.00
11	20	43	2.15
12	20	46	2.30
13	20	48	2.40
14	20	50	2.50
15	20	51	2.55

② Calculate

Step A →

(5 units of Time) (2 volumes of depletion/unit of time) = 10 units of Organic

Step B →

(10 units of Time) (2.5 volumes of depletion/unit of time) = 25 units of Organic

Step C →

(5 units of Time) (2.3 volumes of depletion/unit of time) = 11.5 units of Organic

Step D →

(5 units of Time) (2 volumes of depletion/unit of time) = 10 units of Organic

③ Modify Recipe
